

Submission Requirements

Authors are required to prepare and submit the extended abstract in accordance with the following requirements:

- The extended abstract shall not exceed **four (4) pages**, including figures, tables and references.
- The manuscript shall be prepared on **A4-sized paper** using **single-line spacing**.
- The manuscript shall be typed in **Times New Roman** font.
- The page margins shall be set at **2.54 cm (1 inch)** on all sides.
- The manuscript shall be submitted in **Portable Document Format (PDF)**.
- Figures, tables and illustrations shall be clearly numbered, captioned and referred to within the text.
- Authors who use Artificial Intelligence (AI) tools during the development of the innovation or preparation of the manuscript shall disclose the AI tools used and describe how the outputs were verified and validated by the authors.
- The submitted extended abstract must be the original work of the author(s) and must not infringe any copyright or intellectual property rights.
- Failure to comply with these submission requirements may result in the extended abstract being rejected or returned for correction.

Format Extended Abstract:

YOUR INNOVATION TITLE STARTS HERE

(Title: Please provide a descriptive title of the paper. The title should be concise and not span more than 2 lines. Use Times New Roman with a font size of 14 pts and in boldface for the title.)

Author One^a, Author Two^a, and Author Three^b

^a Department of XXXXXX

Pusat Latihan Pengajar dan Kemahiran Lanjutan (CIAST), Shah Alam, Malaysia

^b Department of XXXXXX

Kolej Teknologi Termaju XXXXXX, Johor, Malaysia

*Corresponding Author

E-mail: XXXX@XXXX.XXX.XX

(Authors and Affiliations: Include the first name, middle initial and surnames of all the authors. The name of the corresponding author should be asterisk (*). The affiliations of all the authors should be included. The e-mail of the corresponding author should be shown.)

Extended Abstract

(Extended Abstract: Use Times New Roman font with a font size of 11 pts for the abstract. The main text should be justified on both sides.)

Keywords: xxx, xxx, xxx, xxx, xxx, xxx

(Keywords: Provide three (3) to six (6) keywords, separated by comma, arranged in alphabetical order and avoid repeating words already used in the title.)

1. Background / Problem Statement

Briefly describe the real problem, institutional or industry context, target users, and why the issue requires an innovative intervention. Include evidence of need where possible. Clearly explain the gap between current practice and the proposed innovation.

2. Innovation Objective

State the main objective and specific objectives of the innovation. Objectives should be measurable and aligned with the problem statement.

3. Description of Innovation

Explain the product/innovation, method, process, model, module, application, teaching aid, system, log prompt or service developed.

4. Methodology / Development Process

Describe how the innovation was developed. Explain the development process, methods, tools, technologies or platforms used, and how the innovation was tested or validated. Include user feedback, pilot implementation, or evaluation results where relevant. You may also include a simple workflow, conceptual framework, system architecture, or process diagram to support the explanation.

5. Innovation Value Proposition

Component	Description
Novelty	Explain what is new, improved, differentiated, or more efficient compared with existing practice.
Usefulness	Explain how the innovation solves the problem and supports users or stakeholders.
Replicability	Explain whether the innovation can be adopted by other courses, departments, institutions, communities, or industries.
Cost Effectiveness	Explain cost saving, time saving, productivity gain, or resource optimization.
Sustainability	Explain long-term usability, maintenance, digital scalability, environmental or social value.
Scalability	Explain the potential for wider deployment across institutions, industries or countries

6. Findings, Validation and Evidence of Effectiveness (Where Applicable)

Present key findings from testing, survey, observation, performance comparison, expert validation, user acceptance, or implementation data. Use concise quantitative or qualitative evidence, such as mean score, percentage improvement, reliability value, user satisfaction, or productivity outcome. Tables and figures should be readable, properly labelled and referred to in the text. Insert figure(s) only when necessary to support the innovation. Quantitative evidence is encouraged wherever possible.

Table 1. Suggested Evidence Table

Evidence Item	Before / Baseline	After / Result	Interpretation
[e.g., User score]	[Insert data]	[Insert result]	[State implication]
[e.g., User score]	[Insert data]	[Insert result]	[State implication]
[e.g., User score]	[Insert data]	[Insert result]	[State implication]

Note: Authors may modify or expand the table according to the nature of the innovation.

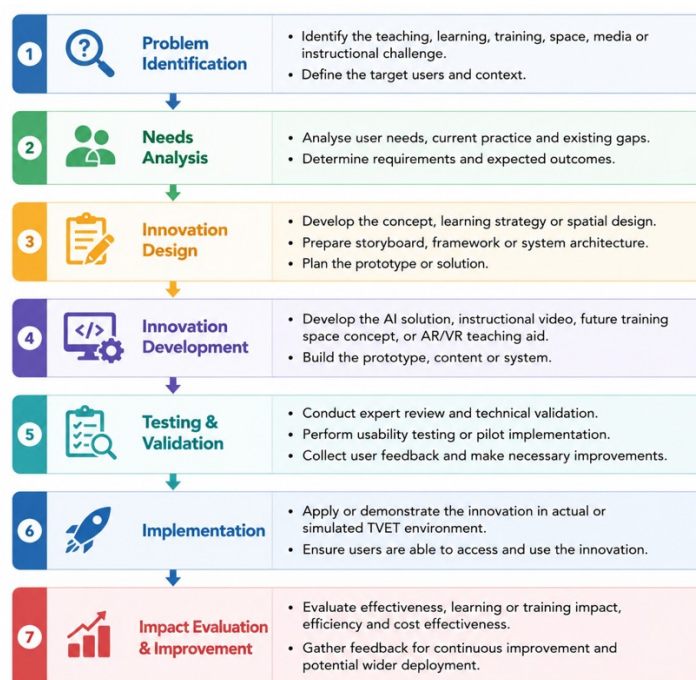

Figure 1. Example of a General Innovation Workflow

Note: Authors may adapt this workflow according to the nature of the innovation category, namely AI DigiTeach, Short Video Instructor, Future Training Space Ideation or Immersive Digital Teaching Aid.

7. Impact of Innovation

Summarize the impact on students, lecturers, institution, industry, community, sustainability, policy, operational efficiency, or commercialization. Focus on measurable and strategic impact.

Academic / Learning Impact	Describe improvement in knowledge, skills, engagement, performance, or assessment readiness.
Operational / Institutional Impact	Describe efficiency, standardization, cost saving, scalability, or quality enhancement.
Community / Industry / Market Impact	Describe adoption potential, target market, social value, or partnership relevance.
Commercialization Potential	Describe IP status, packaging, pricing potential, market readiness, or future business model.
Policy / TVET Ecosystem Impact	Explain contribution to TVET transformation, national agenda or policy implementation.

8. Conclusion

Conclude with the overall significance of the innovation, its contribution, readiness for wider implementation, and future enhancement. Keep this section concise and outcome-driven. Do not introduce new findings in this section.

Acknowledgements (Optional): The authors would like to express appreciation for the support of the sponsors.

(Acknowledgements: Any acknowledgements can be included at the end of the main body of the extended abstract but before the references. This section is optional.)

Declaration

The authors declare that:

- The work is original;
- All authors have contributed substantially;
- No plagiarism has occurred;
- AI-generated content, if used, has been reviewed and validated by the authors.
- All data presented are accurate and can be verified upon request.

References

- In-text citations shall follow the author–year citation format (e.g., Author, 2006; Author & Author, 2007; Author et al., 2008).
- References shall be listed alphabetically at the end of the manuscript.
- Authors are encouraged to use the APA (7th Edition) referencing style consistently throughout the manuscript.
